Total Piping Solutions has been supplying “Cleaned for Oxygen” copper fittings to medical gas piping installers from coast to coast. Total Piping Solution’s fittings, both copper and brass are “[Cleaned for Oxygen Service](#)” per [CGA G-4.1-2004](#) specifications and meet all NFPA 99C requirements. All Oxygen cleaned copper fittings are bagged and identified by fitting description and lot number. Every order includes a certificate verifying that the fittings purchased have been “[Cleaned for Oxygen Service](#)”. Random lot samples are periodically submitted to an independent third-party laboratory for testing and inspection to insure that all our fittings meet GCA G-4.1 and NFPA 99C “Cleaned for Oxygen” standards.

Total Piping Solutions also offers a line of [valves, parts, equipment and tools](#) specially selected for the medical gas piping installer. The equipment and tools we offer meet and/or exceed the NFPA guidelines for performance criteria.
